

NIKHIL TULSANI

Senior QA Engineer | Transitioning to AI Engineer | Test Automation • Agentic AI • AI-Augmented QA

nikhil.tulsani1@gmail.com | +919574711771 | Ahmedabad, India

Portfolio: [nikhiltulsani1.github.io](https://github.com/nikhiltulsani1) | linkedin.com/in/nikhil-tulsani-3a2575126 | github.com/nikhiltulsani1

PROFESSIONAL SUMMARY

Senior QA Engineer with 8 years of hands-on experience in manual testing, automation testing, and end-to-end quality ownership across SaaS, BFSI, and Healthcare domains. Currently transitioning into AI Engineering — on a live healthcare account, built a production AI-powered platform using OpenAI Codex (database schema design through full AWS deployment), bridging directly from 2.5 months of AI-augmented test automation with GitHub Copilot. Holds working knowledge of agentic AI architecture (Model Context Protocol, LangGraph, LangChain, RAG) and has shipped personal AI projects including a multi-agent system and an AI-powered mobile application. Proven track record architecting automation frameworks using Selenium, Playwright, Appium, and Katalon, consistently reducing regression effort and accelerating release cycles. Adept at leading QA teams, collaborating with cross-functional stakeholders, and delivering high-quality software in Agile/Scrum environments.

CORE COMPETENCIES

Test Automation • Manual Testing • API Testing • Backend Testing • Load Testing • Functional Testing • Regression Testing • Integration Testing • Test Planning • Defect Management • BDD / TDD • Agile / Scrum • CI/CD • SDLC • Team Leadership • Agentic AI • AI-Augmented Testing • Production AI Delivery

TECHNICAL SKILLS

- **Automation Tools:** Selenium, Appium, Playwright, Katalon, REST-Assured, SoapUI
- **AI & Agentic Tools:** OpenAI Codex, GitHub Copilot, Claude AI, Claude Code, LangChain, LangGraph, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG) fundamentals
- **Programming:** Core Java, Python
- **API & Backend:** REST API Testing, SoapUI, Database Testing, Message Broker Testing
- **Performance Testing:** Apache JMeter (Load Testing, Performance Benchmarking)
- **Frameworks:** Cucumber, Gherkin (BDD), Data-Driven Framework, Page Object Model (POM)
- **DevOps & Cloud:** Jenkins, GitHub, Git, Azure DevOps, CI/CD Pipeline Integration, AWS (ECS, API Gateway, S3, Secrets Manager), n8n (Workflow Orchestration)
- **Platforms:** Web, Mobile (Android/iOS), API, SaaS, Healthcare, BFSI Applications

PROFESSIONAL EXPERIENCE

Senior Engineer – Quality Assurance

Sep 2022 – Present

Hexaware Technologies | Ahmedabad, India

- Owned end-to-end test automation on a live healthcare account spanning database validation, message-queue pipelines, API layer, and UI — including coverage across dependent downstream applications.
- Spent 2.5 months writing test automation scripts using GitHub Copilot, integrating AI-assisted development into the SDLC for faster script generation and review cycles — this AI-tooling experience became the bridge into an Applied AI Engineer track on the same account.
- Designed the database schema and built a production AI-powered platform using OpenAI Codex, deployed on AWS (ECS, API Gateway, S3/CDN, Secrets Manager) with CI/CD pipeline integration via Azure DevOps. Continue to actively build on the platform.
- Designed and implemented automation frameworks using Selenium, Playwright, and Katalon, reducing manual regression testing effort by approximately 60% and improving test cycle speed.
- Conducted defect triage and root-cause analysis sessions that improved defect resolution turnaround time by 30%, directly increasing sprint velocity.
- Mentored and coached junior QA engineers; championed a quality-first engineering culture within Agile Scrum squads.

Senior QA Engineer

Jul 2021 – Sep 2022

Maruti Techlabs Pvt. Ltd. | Ahmedabad, India

- Owned end-to-end quality assurance for a flagship SaaS communications platform, including white-label partner deployments across multiple enterprise client environments.
- Built and maintained UI and API automation test suites using Selenium and REST-Assured, achieving over 80% automated test coverage.
- Led a QA team of 4 engineers — facilitated daily Scrum meetings, reviewed test cases, tracked sprint velocity, and resolved team blockers.
- Collaborated directly with white-label client stakeholders to gather requirements, define acceptance criteria, and align testing strategy with business objectives.
- Introduced Cucumber and Gherkin BDD practices, improving requirement clarity and reducing miscommunication between business and engineering teams.

QA Engineer

Jul 2020 – Jul 2021

Maruti Techlabs Pvt. Ltd. | Ahmedabad, India

- Architected UI and API automation frameworks from scratch using Selenium and REST-Assured, establishing the team's baseline test infrastructure.
- Executed functional, integration, regression, and sanity testing for a multi-tenant SaaS platform and its white-label derivatives.
- Performed backend testing covering message brokers, schedulers, data stores, and REST APIs; maintained real-time error-log monitoring dashboards.
- Conducted load testing and API performance benchmarking using JMeter, identifying performance bottlenecks that informed the product's scalability roadmap.

Associate Quality Analyst

Jun 2018 – Jul 2020

Streebo Solutions Pvt. Ltd. | Ahmedabad, India

- Delivered functional and manual testing across multiple BFSI client projects spanning Insurance, Banking, and internal enterprise applications.
- Executed load testing using Apache JMeter for a banking application's backend services; produced detailed performance reports presented to executive stakeholders.
- Built a mobile automation testing framework using Appium with BDD (Cucumber/Gherkin) and data-driven methodology for the company's flagship mobile product.
- Delivered an API automation engagement using RESTful API testing and SoapUI, producing a fully reusable automation test suite.
- Established Jenkins CI/CD-integrated test execution pipelines, enabling automated nightly regression runs and improving defect detection turnaround.

PERSONAL PROJECTS

PRD-to-Sprint Negotiator

- Built a 5-agent pipeline that converts a Product Requirements Document into a sprint backlog with Model Context Protocol (MCP)-compatible output for Jira, Azure DevOps, and Linear. Microsoft Agents League Hackathon 2026, Reasoning Agents track.

Project Kickstart Agent

- Built a CLI tool that generates a production-ready GitHub repository from a plain-English description in under 60 seconds, supporting five programming languages with CI pipelines for each. Microsoft Agents League Hackathon 2026, Creative Apps track.

EDUCATION

Master of Computer Applications (MCA)

2018

L.D. College of Engineering, Ahmedabad | CGPA: 8.28 / 10

Bachelor of Computer Applications (BCA)

2015

Shree Swaminarayan College of Computer Science, Bhavnagar | CPI: 8.18 / 10

ACHIEVEMENTS

- Elite Engineer Recognition Award — Hexaware Technologies, May 2026, for delivering a production AI-powered platform on a live healthcare account.
