PROFESSIONAL SUMMARY

Manager, QA (G6) with **8 years** of software quality, automation, and delivery experience, now doing hands-on AI engineering on a live US healthcare account. Built a production AI-powered platform from database schema through AWS deployment and lead AI-augmented development on the account since Apr 2026. Independently shipped **Calibrated RAG** and **DriftPin** with explicit evaluation, guardrails, observability, traceability, and documented failure analysis. Strength: applying production QA discipline to build AI systems whose behavior can be measured, reproduced, and defended.

TECHNICAL SKILLS

AI Engineering: Python, RAG, LangChain, LangGraph, Model Context Protocol (MCP), RAGAS, hybrid retrieval (BM25 + dense/RRF), LLM evaluation, guardrails, OpenTelemetry, OpenAI Codex, Claude Code

Cloud & Data: AWS (ECS, API Gateway, S3/CDN, Secrets Manager), Docker, PostgreSQL, OpenSearch, Redis, Azure AI Foundry

Quality Engineering: Selenium, Playwright, Appium, Katalon, REST-Assured, SoapUI, JMeter, Cucumber/Gherkin, API/backend testing, test architecture

DevOps & Programming: Azure DevOps, GitHub Actions, Jenkins, Git, CI/CD, Python, Core Java

PROFESSIONAL EXPERIENCE

Manager, QA (G6) - promoted Jul 2026

Sep 2022 - Present

Hexaware Technologies | Ahmedabad, India

- Built a production AI-powered platform on a live US healthcare account: designed the database schema, developed with OpenAI Codex, deployed to AWS (ECS, API Gateway, S3/CDN, Secrets Manager), and integrated Azure DevOps CI/CD.
- Lead AI-augmented development on the same account since Apr 2026, evolving from GitHub Copilot-assisted test automation into hands-on platform engineering and delivery.
- Owned end-to-end automation across database validation, message-queue pipelines, APIs, UI, and dependent applications using Selenium, Playwright, and Katalon.
- Mentored QA engineers and drove test architecture, defect triage, and quality practices across Agile delivery.

Senior QA Engineer (Jul 2021 - Sep 2022) | QA Engineer (Jul 2020 - Jul 2021)

Jul 2020 - Sep 2022

Maruti Techlabs Pvt. Ltd. | Ahmedabad, India

- Owned quality for a multi-tenant SaaS communications platform and white-label enterprise deployments; led a 4-person QA team after promotion.
- Built UI and API automation frameworks with Selenium and REST-Assured and executed functional, integration, regression, and backend testing across message brokers, schedulers, data stores, and REST APIs.
- Ran JMeter load and API performance tests to identify bottlenecks and support scalability decisions.

Associate Quality Analyst

Jun 2018 - Jul 2020

Streebo Solutions Pvt. Ltd. | Ahmedabad, India

- Delivered functional and manual testing across BFSI projects spanning banking, insurance, and internal enterprise applications.
- Executed JMeter load testing for banking backend services and presented performance findings to stakeholders.
- Built an Appium mobile automation framework using Cucumber/Gherkin BDD and data-driven testing.

SELECTED AI ENGINEERING PROJECTS

Calibrated RAG - Hybrid RAG with Guardrails

- Built an observable research-paper RAG system using BM25 + dense retrieval, RRF fusion, reranking, guardrails, provider fallback, and OpenTelemetry; designed to abstain when evidence is insufficient.
- Measured **0.9753 RAGAS faithfulness** on a 36-question paraphrased expansion set; repeatable evals also track abstention, over-refusal, retrieval quality, latency, and failure cases.

DriftPin - Requirement-Centric Agentic QA

- Built a schema-validated agentic QA CLI with deterministic requirement IDs, spec-consistency checks, requirement-to-test traceability, ambiguity reporting, and per-run evidence ledgers.
- Release 1 verified **100% requirement coverage** across Groq, NVIDIA NIM, and local Ollama structural runs; a 9-defect adversarial spec eval produced **5 full + 4 partial catches**, with known limits documented.

Microsoft Agents League 2026 - Two Solo Submissions

- PRD-to-Sprint Negotiator: 5-agent PRD-to-backlog pipeline with capacity enforcement and MCP-compatible Jira/Azure DevOps/Linear export.
- Project Kickstart Agent: CLI generating single-commit GitHub repos across 5 languages with deterministic CI templates, model fallback, and a 33-test suite; demo runs in ~90 seconds.

CERTIFICATIONS

- **IBM RAG and Agentic AI Professional Certificate** - IBM / Coursera - completed Oct 2026
- **Claude Certified Associate - Foundations** - Anthropic / Pearson VUE - 884/1000, issued Aug 2026; valid through Aug 2027
- **Claude Partner Badge - Claude Code** - Anthropic / Credly - earned Aug 2026

EDUCATION & RECOGNITION

MCA - L.D. College of Engineering, Ahmedabad | CGPA 8.28/10 | 2018

BCA - Shree Swaminarayan College of Computer Science, Bhavnagar | CPI 8.18/10 | 2015

Elite Engineer Recognition Award - Hexaware Technologies, May 2026, for delivery of a production AI-powered platform on a live healthcare account.
